Debs and Other A. R. U. Officials Must Stand Trial.

ARRESTED AND RELEASED ON BAIL

Charged with Conspiracy to Delay the United States Mall-Debs' Telegrams Produced After a Protest-The Knights of Labor Called Out.

CHICAGO, July 11 .- Slowly but steadily the federal government is moving to the accomplishment of that for which its powers were delegated to it-the preservation of order and the safety of life and property. At Chicago, in conjunction with the state and the municipality, it has already brought peace out of the condition of war which prevailed last week. At San Francisco, Sacramento, Los Angeles and various points in Colorado and Washington it has let loose the dogs of war in token of its intention to have

In this city, the military army having accomplished its purpose, the judicial arm yesterday took up the orderly course of its duties, which include the fixing upon the guilty parties the measure of their crims and the titting of the punishments thereto.

The first step in this procedure was the assembling of the federal grand 'dry and the delivery of the charge to it by Judge Grosscup The determination of the national authorities not to be turned saide from an extanstive inquiry into the ques-

tions which it has undertaken to preupon by mere technicalities was svinced, at the outer by the bru-queness with; which it swept aside the flea of privacy; strikers, will con and privilege which the Western Union, has been settled. Telegraph company was forced to put in a when the jury called for the messagefrom President Date to the members of his order which had been transmitted over its lines. The court held the public safety was paramount to private right, and so ordered that the dispatches be pro-

That it is the intention of the government is the be too long about the work in hand was shown from the fact that the footsteps of the telegraph official who brought then soutches had scarcely reased a to echo along the corridor leading to the grand jary room when that hody filed into Judge Gree-cap's court and announced that it had found true bills of indictment against Eugene V. Debs, president of the American Railway umon; George W.Howard, it- vice president, Sylvester Kelcher, secretary, and L. W. Rogers, one of its di rectors, and shortly thereafter the four men were arrested. They are charged with conspiracy to commit an unlawful act. that is, to block the pregress of the United States mail. Joined in the indictment with the four leaders of the radway union was James Murwin, the itock Island striker who threw the switch which derailed a mail train at Blue Island on the night of June 39.

Debs, Howard, Kelcher and Rogers were taken into the office of District Attorney Milchrist immediately after their arrest, and after a few hours' detention were released on bail by Judge Grossenp, their bonds being \$10000 each. The bonds men are Alderman William Fitzgerald, who qualified to the sum of \$250,000 and William Shakel, who qualified to the sumof \$50.0 0, the bonds being in the sum of

\$10,000 each. The federal grand jury spent but a short time on the case of Debs and the other leaders. The case against them for conspiracy had been prepared some days ago by Attorneys Milchrist and Walker, and the grand jurors had not been at work two hours when the indictment was received and presented in court. It was based on some of the public utterances of Debs and the other leaders, and this was clinched by the original orders in write, a sent out by Debs directing men on the different railways to quit their work, an !

this stopped the running of mail trains Marshal Arnold found Debs in his apartment at the Leland. The strike leader was sitting in an outer reem which he used as an office when the marshal appeared and there were several persons with him. When the marshal introduced himself Debs stepped tack into an inn a room, asking the murshal to go with him

and then the marshal showed his warrant "I am ready to go with you," said Deba, with apparent cheerfulness, as he walked into the outer room and reached for his

Deby in an interview said. "Since I have I een brought here I have been informed that officers of the court have gone to our headquarters in the Ashland and taken my personal correspondence and some of the records of the American Ruilway union. I do noteknow by what right this act has been committed. I: seems to me to be an infamous outrage. Not only did they take my personal of fects and papers, but carried with there. my unopened mail I have never been

am informed by what right the act was committed In Ru-sia, and not out of that country, have such things been done It seems to me like the act of the czar of Russia instead of the act of a free coun-

"The seizures were made by an officer of the court and a postoffice official I am not running a lotters, and I cannot understand by what law the postoffice authorities are a party to the seizure of my private mail. It is an outrage, and you call this a free country? It seems to me not to be compatible with the stars and stripes. It is no longer a question of right in this country, but a question of force, and ansolute force at that.
"As to the arrest I have absolutely noth-

ing to say; we have not committed any offense or crime. We are responsible for our acts and will answer at the proper time, and abide by the consequence. The arrest will not deter us from our work. We will go on just exactly as we have done. If we were to do differently it would be an admission that we have been in the

District Attorney Milchrist, when questioned about the selzure of the effects of Mr. Debs, said-

"The-e men were arrested on a subposna, duces tecum, a perfectly legal operation, whereby they are commanded to bring with them everything appearaining to their business. In this case we have a corporation to deal with, the A. R. U., the effects of that organization can be brought into court on a warrant of the Lind issued today. It is not an unusual procedure in this court. Only recently when we were trying the railroads for violiation of the interstate commerce laws we issued the same process?

Touching the outlook for the future, cutside of Chicago it may be said that the dispatches are aimost uniform in tenor to the effect that normal conditions have already been restored, or that they are rapidly approaching that state, and there seems no reason to suppose that the progress roward a complete resumption of trais and traffic will meet with any serious check as the coming days shall suoceed each other. In other words, it does not seem possible, with all the forces of law and order as now arrayed, with their leader put to bis own defense at the bar of justice, with the'r ranks beginning to te depleted by desertions and with the strain which they have already endured that the American Railway union can rally its forces for a strongule which must meeds be long and discouraging at the

Knights of Labor 'broughout the entire country, numbering nearly 1,000,000 men, have been called upon to strike for the cause of organized labor. General Master Workman Sovereign issued an order late last evening to all members of the organization to cease work. The conflict, originating in the strike of the Pullman strikers, will continue until that strike

Certain minor officials of the state of Indiana and some of the citizens of Hammond it is claimed, will make an effort to hold lederal officials responsible for the death of Charles Flerscher, one of the rioters shot down by soldiers of the Fifteenth infantry Sunday afternoon. Warrants charging the soldiers with murder have already been 1450ed, and it is said there is a movement on fact to swear out similar papers charging the head of the government and his chief executive assistant with being accessories before the fact. The claim is that the soldiers fired into a body of reaceful citizens, and on this claim the widow will institute proceedings against the government for

#### SACRAMENTO LOOKS WARLING. Strikers There Declare They Will Resist Government Troops.

FRANCISCO, July 11.-There are many conservative men of affairs here who fear and believe that today will develop a de-perate conflict between federal soldiers and the striking A. R. U men and their allies Sacramento is the prominent threatening point. The seriousness of the situation is shown in the warlike precautions that the army authorities have taken. At 11 o'clock yesterday the big ferry steamer Alameda started out from the Cakland mole and steered directly across the bay to the Presidio wharf.

At 11.45 the steamer had effected a landing, and there was all the noise and bustle of a basty embarkation of horses and infantry. Two troops of cavalry and five batteries of light artillery were rushed on board. Gatling guns and two Hotchkiss cannons were in evidence, and Colonel Graham, commandant at the Presidio, was personally in command of the expedition. The Alameda, with her formidable looking cargo, steamed directly toward the mouth of the Sacramento river, but so guarded had the army authorities been that it was not known until she entered the river channel whether her destination

was the state capital or Oakland. The publication of President Cleveland's proclamation extending the conditions of martial law to California caused intense excitement in Sacramento, but when it became positively known that Colone! Graham and his soldiers to the number of 500, were already en route to reinforce the state troops at the state capitol, the excitement there became wild and ominous. The strikers grew louder in their threats to resist any further attempt to clear the railroad yards and depot and their leaders loudly proclaimed that the Southern Pacific company would

not be permitted to move its trains. Nor were the hostile demonstrations confined to talk alone. Armed men soon appeared in the streets. As if preparing for battle, they trunsferred their arms and ammunition to their I sidquarters near the radread yards. No attempt at concealn out was made. The strikers marched boilly through the streets, bearing their went ins on their shoulders, and they were lengly cheered by hundreds of sympathizers. It is clarated that the A. R. U. arso nal holds at least 1,600 rifles and shorguns, and quantities of ammunition.

For the relief and cure of a cold in the head there is more potency in Ely's Cream Balm than in anything else it is possible to prescribe. This preparation has for years past been making a brilliant success as a remedy for cold in the head, entarrh and hay fever. Used in the initial of these complaints Cream Balm prevents any serious developement of the symptoms, while almost numberiess cases are on record of radical cures of chronic catarrh and hay fever after all other treatments have proved of no avail.

# AWED BY ANARCHISTS.

Foreigners at Spring Valley Have Terrorized All Classes.

FIRED UPON BY THE SOLDIERS.

Two Men Eilled and Five Wounded as the Result of an Unprovoked Attack by Rioters Upon the Troops-The Mob Flnally Put to Flight.

SPRING VALLEY Lis., July 11.—Affairs here are taking on an ominous look. The miners nave so intimidated all classes of the people with threats of what will sappen after the troops are removed that every obstacle is placed in the pathway of the soldiers, and an classes actin a hostile manner Mayor Jackson, who is evidently terrorized, ordered the soldiers out of town, but they refused to obey. The telegraph operator was frightened away. and one of the soldiers is at the key.

The storekeepers have been made to refuse to sell supplies to the troops, and the latter have, in consequence, taken possession of the company's store, soldiers acting as custod.ausin place of the terrorized cierks. So far has this reign of anarchy extended that the woman upon whose property the well from which the troops draw water is situated piteously begged the officers to secure water elsewhere, as the anarchists gave her until today to refase water upon penanty of ourning her nouse to the ground.

Company C, of the F:fteenth regulars, commanded by Captain Conrad, came into collision with the mob late yesterday afternoon, and after patiently enduring volley after volley of stones fired into the mob, killing two men and wounding several others.

The dead are: Dominic Barlmer, Italian, shot through the head; Jenn Saloii, Italian, shot through the breast. Injured: Walter Gregory, deputy, ribs broken and badly bruised. Lush Kolp, deputy, shot

in thigh: S T Powell, deputy, shot twice

in face, unknown Italian rioter, shot by Deputy Powell; unknown rioter, hard and arm badly lacerated by bayonet. The night occurred when a Hock Island train bearing the troops pulled into the depot. At the time of its arrival a large mob of Lithuanians, Poles and Huns was gathered upon the hill everlooking the depot The arrival of the train was greeted with yells and jeers, and stones began to

rattle down upon the depot platform be-

fore any of the soldiers had left the cars. As the men filed out on the depot platform they were greeted with a chorus of yelis, and the stones rained down around them. Captain Courad raised his hand and called to the mob to cease throwing stones. It obeyed him for an instant, but seeing the troops remain passive, regained its victousness and sent volley after volley of stopes at the soldiers, at the same time drawing closer and becoming more threatening Captain Conrad his men to stones came at their neads be gave the word to fire The mob broke for the timber when the fring tegan, and has not as-

sembled since. Early in the morning as a party of deputies were traveling from Princeton to Spring Valley in wazons some strikers in ambush fired upon them, wounding Deputy S. T Powell in the face. The fire was returned and one man was seen to fall. He was, however, carried off by his companions, and the extent of his injuries is

### The Vigilant's Fourth Defeat.

HUNTER'S QUAY, July 11 .- The Britannia and Vigilant met again yesterday, this time in the race for the Clyde Corin thian cup, valued at \$300. dred People Killed. CONSTANTINOPLE, July 11 .- Two violent earthquake shocks were felt here yesterday afternoon. Each shock lasted twenty seconds. Some damage was done, theextent of which is unknown. The inhabi-

tants fled from their bomes in anticipation of a more serious disturbance. Several houses fell in Stamboul. In the suburb of Galata the shock was severe and the new quays were reduced to a ruin. The people were greatly alarmed when their houses began to sway, and

fled in terror to the streets. A tresh and more severe shock was felt in this city last night. An indescribable panic followed, and the people ran hither and thither in the utmost confusion.

The shock was felt in its full severity in all the villages bordering on the Bosphorus and the Sea of Marmora. Most of the buildings to these places suffered damage and a number of houses were ruined completely. The people have sought shelter in the fields cutside the villages, where they will be safe from falling walls should

further shocks occur It is believed fifty persons have lost their lives and that the number of injured far exceeds that figure The coss of property will be very large.

There have also been severe shocks of earthquake in Smyrna, a seaport of Asia Minor, the Island of Scio, off the west coast of Asia Minor, and in the Darda-

The Bill to Admit Utah Passes the National Senate.

SENATURE DISCUSS THE STRIKE.

#### Mr. Peffer's Arraignment of the President for Sending Troops to Chicago Vigoreasly Compated by Mesers. Davis and Gordon-Postoffice Appropriation Passed

WASHINGTON, July 11.—There has rarely been witnessed in the senate such an earnest, ardent debate as that which cama yesterday from Mr Peffer's Populistic resolution providing for government control of railways and coal mines and the adoption of the single tax system. Mr. Peffer himself opened the discussion with a defense of the Chicago rioters, an arraignment of the president for sending troops there and a protest against the growing militarism of the country in generai

This led Mr Davis (Minn.) to bilt denounce the lawlessness of the Chicago mob and the bad policy of the senator from Kansas in inflaming their passions by the introduction of such a resolation.

Mr. Gordon (Ga) also condemned the action of the Kansas senator, and ha quoted Lord McCauley's prophecy that in some great public uprising (like the present) this country would either lose its civilization through mob law, or in putting down mob law by the strong arm of power would lose its liberties. Such an occasion now existed, and to put down the lawlessness he pledged the support of all who fought in the Confederacy in

The stirring speeches of Senators Davis and Gordon were followed by the introduction of a resolution as a substitute for the Peffer resolution emphatically endorsing the president and declaring that the laws must be upheld. The resolution seemed on the verge of passing wher a went over at the request of Senator Gallinger. The senate then took up and passed the postoffice appropriation bill as it was reported from the committee, though some debate arose over the proposition for mail subsidies for states along the Onio river. These amendments were defeated, Late in the day the bill for the admission of Utah was taken up and passed without

debate or opposition. The house passed a bill opening the Uncompangre and Uintah reservation in Utah, alloting lands in severalty to the Indians and restoring about 3,000,000 acres to the public domain. Most of the day was devoted to debate on a bill extending the act of 1890 declaring lands granted to railroads not then constructed forfeited to the government so as to forfeit the lands of railroads whose roads were not completed within the time specified in the land grants. It excludes from the operation of the act, however, lands acroads confirming such titles. The bill involved about 54,000,000 acres. It was not disposed of. The title of Mr. Enlag to his seat as representative from the Eighth Tennessee district, which was contested by B. E. Thresher, was confirmed without opposition.

### MYLAN'S GREAT SHOW

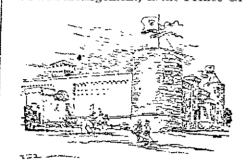

IT IS IN EVERY WAY WORTHY OF THAT BEAUTIFUL CITY.

A Castle Dating From the Fifteenth Century Is Used as One of the Most Important Buildings-Hasty Review of Some of the Most Notable Features.

According to all accounts, the exposition now going on at Milan is one of the most successful of the year, judged both from the quality of the show itself and the attendance of visitors.

The exposition grounds are to the north of the city, centering in the historic old castle of the Sforza-Visconti, a structure that has had a prominent place in Milanese records ever since the fifteenth century. The scheme for the present exposition was broached in the public journals as early as March, 1893, and although last year was one of depression in Italy and indeed in all Europe as well as in America, the Milanese took hold of the matter at once and with enthusiasm, and by the beginning of 1894 it was well understood by the people of the entire country that Milan was not only in earnest, but quite competent to organize and carry through to a successful termination a fair that would combine transient interest with permanent benefit both to Milan and indirectly to her sister cities.

Not only is the exposition fortunate in being allowed the use of the eastle and its grounds, but the president of the executive committee, who has had charge directly of the work of construction and arrangement, is the Prince Gi-

THE CASTLE IN 1400.

an Giacomo Trivulzio, a scion of a noble Milanese family, a brave soldier, a polished gentleman, an accomplished scholar and above all a practical man of affairs. The grounds about the castle are spacious and beautiful and crossed by a network of noble avenues-they call them vias in Milan-and the whole space has been decorated in the gayest, most attractive manner possible. Especially bright was the appearance of the grounds on the opening day, which was graced by the presence of the king and queen themselves, Premier Crispi and many other Italian dignitaries.

The central buildings are described as very beautiful. They were designed by Caviterre Guiseppe Somarugga, an eminent Milanese architect. Other important buildings are the Pompeiian theater, the Sports building, many cafes, restaurants, etc. One of the most important departments of the entire show is that devoted to the "operaja," or working class. The experiments that have been made in the direction of cooperative labor in Milan have been elaborate and so successful as to attract the attention of students and economists from all over Europe. With full consideration of the facts the directors of the exposition have given this department more space than any other, and they have been rewarded for their sagacity by the absorbing interest that has been bestowed thereon by the visitors.

The horticultural section has been arranged in such a manner as to display a constant succession of exquisite blooms. possibly the palms and orchids being the most attractive features. The photographic section is also highly interesting. One is bewildered, however, in trying to decide which he shall admire most-the artistic or the scientific features. In printing, too, there are many most interesting devices shown, and one of these makes it possible, so it is reported, to print any number of colors at one impression. The new process is called sincromia, and it is asserted that as many copies of a plate with 100 colors may be made in one day by this method as may be turned off by the old method of a picture of five colors in a week. Besides there are not the same opportunities for unsprinting, owing, of course, to the use of but one plate in the new process, as by the old, in which as many plates are required as there are colors to be shown.

The musical section, located in the Pompeiian theater, is also a most interesting one. It abounds in manuscript and antographic scores by the most eminent Italian composers, and likewise in a marvelous variety of operatic costumes. The department of fine arts is one to draw out the most enthusiastic admiration of picture lovers and those who delight in sculpture. There are 2,000 pictures in all and a bewildering variety of examples of the plastic art. The departments devoted to telegraphy and photography, too, are worthy of special mention, the exhibits being of intense interestalike to the professional, the amateur and the layman.

Among the structures the splendid arch of peace is a marvel of artistic beauty. In fact, the exposition of Milan, taken altogether or considered in parts, quite merits the extensive patronage that is being bestowed upon it.

Of the day on which our independ-

ence was declared John Adams said: "It ought to be commemorated as the day of deliverance by solemn acts of devotion to God Almighty. It ought to be celebrated with pomp and parade, with shows, games, sports, guns, bells, bonfires and illuminations, from one end of this continent to the other, from this time forward torevermore."

They don't amount to anything. Consider their value if you bought them in the > regular way, and compare this with the value of ruined linens, paints, etc., that you risk with these washing-powders. There's nothing cheaper to wash with than Pearline. That gives you easy washing that is absolutely safe. You would better use Pearline, and

buy your own prizes. You'd save money. Send Peddlers and some unscrupulous grocers will tell you "this is as good as" or "the same as Pearline." IT'S FALSE—Pearline is never peddled, and if your grocer sends you something in place of Pearline, be honest—send it back.

# MR. WILSON TALKS.

Y Name is Wilson; I do an insurance business on LaSalle street, in Chicago Ill., and I live in Evanston, Ill. Evanston is what was originally a scattering population on a pretty point on Lake Michigan, esteemed years ago far from the city of Chicago, but now one of the varied towns which may go within it by vote of the population.

I am married and have a wife and one child. That child is a boy (I suppose I should feel the same solicitude if it was a girl), and I have a father's natural fancies as to what must be the best thing to give that child the right kind of intelligence, and so divert his course that he may succeed in life. I have studied a great deal upon the subject. My own experience would not be of great value, because I have succeeded only to the limit of the average man and am barely established; still, I own the house and lot upon which I live, and am feeling perfectly safe in meeting the evidencies of the year. I want the how to take a broader view than I did to he the exigencies of the year. I want the boy to take a broader view than I did, to be a bigger man in the world. I have studied how to teach him to do that, and he has a bigger man in the world. I have studied how to teach him to do that, and he has done pretty well, as far as the preliminaries go. Now, I have thought over what I should say to him and have sometimes been puzzled. I could not very well tell him what to do. I wanted to tell him what I needed but what I did not learn myself when I was of his age, and what my father did not know how to tell me, or eise was not thoughtful enough to do so. I wanted to tell him how to follow the example of these who have succeeded at the wasant time and make the circumstances which of those who have succeeded at the present time and under the circumstances which ordinarily affect a young man struggling in this Republic established on this comparatively new world to-day. I wanted to tell him just what he had better do to get along well, and to point out to him what had been done by the people who were successful at the present time.

Of course, the record of the people of any time past would not be of so much va'uc, because circumstances must necessarily have been different when they were alive. I feel confident, though, that if I could learn, some way and somehow, what the people who are so successful to day have done and how they did it, I could give to my boy such advice as would make his own life at least as far removed from fail-

ure as justified by the natural ability he may possess,

I looked around for some authority which I might consult in order to give him the facts most essential with this idea of mine in mind, but I could find none until I discovered that a great publishing firm in Chicago had decided to bring out a book giving the photographs of all the people who are prominent in America to day. Here was what I wanted. The book, as I have learned, is going to be published in 16 parts, 16 pages to each, with a recent photograph on each page of some active leading American man or woman of to-day, while underneath appears the story of that same person's life—the story telling what that person did, and how the ends attained were eventually accomplished. Here was what I wanted; here was what I needed in various ways; here was what I was certainly seeking in order to obtain the information with which to educate my boy ank secure for him that knowledge which will give him a source of thought and make him prominent in the world.

I have the first sheets of this work. It is a graphic story of America's Greatest Men and Women, told in each instance on a single page underneath a photograph of recent date, which conveys to the eye an idea of what that person is. To me the photograph tells even more than the suggestive record beneath; and yet it is odd how in each instance the correct the regret of the suggestive record beneath; and yet it is odd now in each instance the correct story corresponds with the expression upon the face which is reproduced in the portrait above. I do not know how the series will end. I know very little about this new feature of the newspaper people; I know nothing about the publishers and their expectations, but I do know this: that if the series so begun should be continued to its practical, ordinary good sense end-and I don't care whether that will include 200 or 700 of America's Greatest Men and Women, which is the title of the book—I do know this, that for the ordinary, active and alert business man—I will certainly say far more for the student or the literary man, or the politician or the statesman—for all these I will say it will be simply the most valuable and the most remarkable book produced in modern history. The wonder is that some one has not thought of it before. Yet no one seems to have done so since the days of Plutarch. Plutarch knew something. That shrewd old fellow knew that all who would get out of the drift, all who would accomplish great things, wanted to know every detail of the lives of those who had better luck or more courage or a broader brain than their tellows; but I am no authority on these points. I only know that there is produced a second Plutarch's Lives, that its biographies are shrewd, graphic and curt, and written without bias and without prejudice. I only know that there was a Plutarch-God bless the old fellow-and that there is this modern work.

This is the work I am going to give to my boy. I am going to make him read it thoroughly. The work is announced as consisting of 16 Parts, with 16 pages and 16 photographs in each part, and when bound, the whole series will make a great volume of 256 pages, the like of which has never been equaled. It is the story of the personal character of the men and women who are making the nation's history at this particular time. What a work this is! Do you imagine that I would miss it for my boy, or, incidentally, for myself?

ATHLETICS AND RELIGION.

# They Go Hand In Hand In Dr. Scudder's

Tabernacle at Jersey City. "We are told to serve the Lord with gladness, and I propose to get all the fun out of this world that I can and to have my flock do the same if they will," is the platform of Rev. Dr. John L.

Scudder, pastor of the Congregational tabernacle in Jersey City, and it seems to be a rousing success. Dr. Scudder was the son of Rev. Henry M. Scudder, one of Brooklyn's famons divines He is 41 years of age, a Yale graduate and an ex-

first baseman of REV. JOHN L. SCUDDER, that university's baseball team. He left Yale in 1874, became an ordained minister three years later, and as assistant pastor of the First Congregational church of Minneapolis made a reputation as a minister who preached a religion that appealed to the masses.

In 1886 he was called to his present charge in Jersey City. "The best way to fight the saloons," he said, "is to introduce a little godly competition." With this prefatory remark he erected a gymnasium adjoining the church, fitted it up with approved apparatus for muscle making, introduced bowling alleys, billiard tables and reading rooms, arranged a theater for amateur theatricals and a kindergarten and day nursery for the children of the poor. The idea proved so popular among the working people, who form a large share of the congregation, that three years ago the church purchased two adjoining buildings, and the three structures now attached to the church are used for the development of body and mind.

The billiard tables and bowling alleys

did not exactly please the elders at first, but when they saw that the attendance of young men increased tentold they withdrew all opposition. Today more than 400 young men and women, as many more children and about 50 babies daily enjoy the benefits of the church's athletic auxiliary, and most of them, the babies excepted, have become regular churchgoers. There is even a bar at one end of the gymnasium, but soda water, good milk and a fair article of pie are the only refreshments served over it. All the games cost the player just half what he would pay elsewhere. and, as Dr. Scudder expresses it. "every one of them has to be paid for in advance, thus doing away with the gambling habit of sticking your opponent for the game."

One peculiarity is the fact that all religious discussion is tabooed in the playrooms, so that the boy or girl who has no religion will not be frightened away by anything that savors of preaching. Dr. Scudder is not only a thorough athlete and boxer, but an enthusiastic bicyclist. He allows members of his flock to ride their wheels to church and has a storeroom where the bicycles may be checked. "The bicycle," he says, "is a thoroughly Christian machine, for it improves the temper, discourages dissipation and puts vivacity into a man's

THE PACIFIC COAST DEPEW.

Candidate M. M. Estee Is So Called by His Admirers.

Morris M. Estee, who is the Republican candidate for governor of California. has long been known on the Pacific slope as a successful lawyer, having been for years the attorney of the Central and Union Pacific roads and active in important railway litigation. Mr. Estee is also a ranchman, and his vineyards in Napa county produce annually many thousand gallons of wine. He is said to be something of an artist also and a writer of considerable cleverness as well. Mr. Estee's enthusiastic friends

say he is an eloquent speaker and call him the Channey Depew of the Pacific slope. He is fond of spicing his

speeches with good stories, at any rate. Among lawyers Mr. Estee is known as the author of "Estee's Pleadings," book which stands well in legal lore.

He is a native of Pennsylvania, but has long been a resident of California. It was there that he began his political career. The first office he held was that of district attorney of Sacramento county. He was twice elected to the state assembly and served as speaker of that body. As a member of the constitutional convention of his state he took a prominent part. As a candidate for governor in 1882 he was defeated by Mr. Felton, the millionaire successor of Senator Hearst. On another occasion he was unsuccessful in his candidacy for the gubernatorial chair.

Mr. Estee was permanent chairman of the Republican national convention at Chicago in 1888. During that convention, when the crowd had shouted for many minutes over Harrison's nomination, some one asked Chairman Estee why he did not rap them down. "Oh, let 'em alone," he said. "It's

only once in four years, you know.'

BREAKING OF RECORDS.

What Science Can Do In This Line When She Tries Hard,

Steamship captains, horse owners, bicycle riders, and a lot of other people, are making stenuous and untiring efficies to "break the record." The great public looks on at the game with good-natured interest.

Osce in a while sobir science does a a little record smashing on her own account. One of her latest and great schievements is the discovery and appilcation of a process for artificially digesting food, so that it is absorbed immedistely by the system, without imposing the least labor on a weak stomach. This food is called Paskola. It restores the debilitated, and gives fat to the thin because it is starchy. Only starches add real, solid lasting flesh to the body. Oils and fat don't and never will.

Mr. H O. Mahood, of Emlenton, Vernon Co., Pa., says: "I was so weak and run down that I thought I would have to give up my business. I could not eat nor sleep. After one bottle of Paskola I began to gain at once, and I have gained over fifteen pounds in less than three weeks, and I now feel like a new man."

No wonder.

Mrs S. C. Stonch, of Wellington and Daupain streets, Polladelphia, writes: "I have been sick nearly three years, at times suffering terrible burning pains in my back and then cold in the lower part of my bowels. Sometimes I thought I should die. At this time I was consti-pated. When I first began taking Paskola I was tempted to give it up, thinking i. wou'd do me no good, because I had taken so much medicine. I feel Paskola beginning to do me good, and today I took a longer walk than I have been able to take in three years. I am much stronger. I am taking my fith bottle of Pasko's, and I car almost everything row. I am 56 years old, and was always active, baving worked hard,"

Paskola may be bought of any reputable druggiet. An interesting pamphlet on food and digestion will be mailed free, on application, to The Pre-Digested Food Co., 30 Reads street, New York.

HAD HIS WAY FOR ONCE.

Why a Poughkeepsie Militiaman Stopped His Wife at the Guard Line,

From the Newburgh Register. Among the excursionists in State camp on July 4 was the young wife of a private in the Poughkeepsiecompany. Her husband was in the guard detail for the day, and had been posted as a sentry guarding a portion of the camp where visitors are not allowed. The wife after searching vainly for him in his company street, at last discovered him at his post. She ran gladly to greet him, but stopped in dismay before a level-

ed bayonet. "Halt! Who goes there?" sternly challenged the sentry.

"Why, John, don't you know me?" asked the wife in dismay.

"You can't come any nearer." The wife moved a step. "Halt! Corporal of the guard, post seven," he shouted.

The corporal ran from the guard tent to find the wife confronted by

her sentinel husband. All three were from Poughkeepsle and the corporal knew the couple

"Sentry, what is the matter? That's your wife," he said in astonishment. "I know it," said John with a wink, "but I haven't had my own way since we were married, and I thought I'd have it now."

The sentry was soon relieved from duty, and was soon buying ice cream at the restaurant to atone for his cruelty.

Held for the Grand Jury for Horse Theft.

Alex. Burton, the young man who drove away with the team hired by him at Callicoon, was on Monday committed to jail in Monticello to await the action of the Grand Jury. There is still another charge against him,-that of stealing \$15 in money and a lot of paint brushes, a few weeks, ago from a fellow workman at Narrowsburgh.

HAD ABANDONED HOPE Fearful Experience of the Sailors of the Wrecked Whaler James Allen.

WASHINGTON, July 11.-The full report of Captain Healy, of the revenue outter Bear, giving details of the wreck of the whaler James Allen in the Behring sea, and the rescue of twenty-four out of a crew of forty-nine, makes a shocking tale of suffering on the part of the boat's crew, who were finally rescued on Unmak Island. Captain Healy says:

"The men were found in a terrible condition. Oue man, Gideon, had died a week before. Mussels were scarce and the birds wild, so the men said. They had given up all hope of ever being rescued, and were completely demoralized. The body of the man Gideon had been eaten enthrely. They had even dug up the body of one of those who had died two weeks previously, and had partially consumed

it. The trunk lay just outside the hut, with arms and legs cut off, and portions of the meat were in the pot outside the door. No attempt had been made to hunt or to attract attention from seaward. Not even a mark had been set up on the bluff behind them. They had not ambition enough to go down to the beach to gather driftwood to keep their fire going, but had begun to tear down the hut over their

beads. "When found they lay around the firs in the but doing nothing, looking at each other, with the blood of their late shipmates on their hands and faces, and human bones strewn about them on the floor. The men were brought on board the Bear and cared for Some of them were sent to San Francisco, some of the others remaining at Unalaska. One will go north on the Bear to join the whaling

The Stubbern Tariff Conferees.

WASHINGTON, July 11.-The Democratic senate and house tariff conferees adjourned last night, after being together for eight hours, until 10 o'clock today. It was stated that the discussion was being marked by great stubbornness, and that neither eide had yet yielded in the least on any of the main issues involved. The general understanding that the Republican conferees should not be admitted has now advanced to a definite decision - Ur to the time of adjournment no time for making a report had been agreed to, and the determined stand of each side gave little indication of an early report.

If you are incurable they will tell you; therefore invalids must not take moral certainty of a cure being effected. These Doctors are graduates of the best universities of Europe and America; they are of the highest standing in the medical profession and have had unlimited experience in the treatment of all Chronic Diseases and Deformities. As the latest methods, instruments and appliances of the various schools of both the Old and the New World are familiar to and at the command of this staff of dectors, it is reasonable to believe that in ninety cases out of every hundred a cure can be effected, even when the patients have been given up as incurable by doctors who have had less experience. Do not be discouraged because your doctor cannot give you relief, or even if he tells you that you cannot get well, for it matters not what your disease may be, y u can consult the doctors free, and, if curable, they will treat you; if incurable, they will give you such advice as will tend to prolong life and afford you the greatest relief.

A TEN YEARS' FIGHT.

HOW #BRAM CABLE CONQUERED HIS RHEUMATISM.

It Had Twisted His Fingers and Almost Deprived Him of Power to Walk-A Wonderful Cure, but Rheumatism is Not the Bugbear it Once Was.

From the Port Jervis Union.

Two miles above Deposit village, in Broome county, N. Y., near the Delaware River, is situated the beautiful and picturesque farm home of Mr. Abram M. Cable. Mr. Cabl is a well known and respected citizen in the community in which he lives. During the early years of his business life he was ergaged in mercantile pursuits. Later he followed the lumbering business, buying and shipping lumber to the Philadelphia market by way of the Delaware River. At the present time Mr. Cable is devoting his attention to farming.

The story of Mr. Cable's remarkable cure of rheumatism came to the ears of a Union reporter and he determined at the first opportunity to call upon the gentleman and secure the story from Mr. Cable's own lips. Going to Deposit one day last week, the reporter was easily directed to Mr. Cable's home.

The reporter's errand was made known and Mr. Cable at once acquiesced in the request to make known to the army of Union readers the story of his cure. This is what he said:

"I am no hand to take medicine, but some ten years ago, I began to be troubled with rheumatism. My legs were lame and stiff, and it was bard work for me to walk or get around, although I managed to help do the chores until some three or four years ago. Then I got so bad I was unable to do anything. I then consulted the doctors, and commenced to take medicine of various kinds, but nothing seemed to do me any good; in fact I was growing worse day by day."

In reply to the question of the reporter: "How did the rheumatism affect you other than your legs?" he called the reporter's attention to his hands and fingers, and said:

"Why, you can now see how my fingers are twisted. I suffered terribly with them; and as to going up and down stairs, it was almost an impossibility, for my legs refused to act and I was in danger of falling every step I took: but thanks to Dr. Williams' Pink Pills for Pale People, I am all right now."

"How long have you been taking the Pink Pills and how many boxes did you take before you received any benefit?" asked the reporter.

"It was not until last spring that I concluded to try Pink Pills. After I had read of the marvelous cures they had performed I determined to try them. I commenced by purchasing three boxes. Before I had taken half of them I perceived that I was much better. Last fall I bought some more, which did the business and effected a cure. Those exeruciating pains have left me and I can run up and down stairs as easy as a boy. I am now nearly seventy years of age. I consider Dr. Williams' Pink I-ills for Pale People a most wonderful medicine. They have given me new life and strength and actually cured all my rheumatic pains, from which I suffered for tenglyears, and after all other remedies which I tried had failed."

After reading over the above interview to Mr. Oable, which he said was substantially correct, the reporter left him and drove down to Deposit, where his affidavit was taken by Notary Public C. E. Scott, as follows: COUNTY OF DELAWARE, I SS.

STATE OF NEW YORK. This is to certify that I, G. M. Babcock, newspaper representative and reporter connected with the Port Jervis Union, called upon Abram M. TATTOO THE WEDDING RING.

A British Social Reformer Suggests Brand ing Both Bride and Groom

DEAR SIR--I wish in all earnestness to make known a suggestion that would save many a broken heart among the sensitive and many a breach of promise case among the mercantile, and would considerably lighten the labors of the police courts and law courts. My suggestion is that every married man and every married women should have a circle tattooed around the third finger of the left hand in place of or as well as the wedding ring. This would be a sign that could never be taken off or effaced and would therefore leave a lesser margin for the treacheries and tricks of bigamists and other great and small offenses

against law, society and individuals. To make this proposition practical and distinctive, of course certain rules would have to be made. For instance, any unmarried man or woman introoing their third finger to be heavily fined. Every widow and widower to add a distinguishing mark to their ring. Every married man or woman disunited by law to have a bar of erasure across their wedding ring, and those who marry two or three times to add the extra circles accordingly.

The operation of tattooing could with all reverence be performed by an expert in the vestry after the church service, or at the registrar's office for those who only go through the civil ceremony. This tattooing may seem a return to barbarism, but our much vaunted civilization has introduced such numerous aids to deceit that a safeguard and a warning, such as a tattooed wedding ring, would become a practical preventive of much sham, folly and wrong.

Only those who have sympathy for unlawful liberty will demur against the idea being realized. I shall be pleased to hear from all who approve of my scheme and are willing to assist in forming a society to influence others in bringing about a custom that would help to insure peace, respect and happiness to many homes and hearts. Yours faithfully, B. T. KNOLLYS. -Letter to Pall Mall Gazette.

WEDNESDAY, JULY 11, 1894.

- Business Manager

The railroad strike in the West has seriously affected New York's butter supply, for no attempt has been made to ship Western butter since the tie up began. As a result there has been a sharp advance in prices and creamerymen in the East are profiting by the situation.

Brooklyn's Civil Service Commissioners threaten to shut up shop unless they are provided with money for expenses. The Aldermen say they will not vote them a cent. If the Aldermen do not recede from their position Brooklyn will be well rid of a costly and worse than useless humbug.

Only twenty-one of the ninetyeight railroad corporations in New Jersey paid dividends, last year, the remaining seventy-seven having been operated without profit. In many cases in which dividends were paid, it is probable that they were not earned, the leases under which the roads were operated requiring the payment of dividends as rentals.

The only hope of the strikers is in t<del>ne sympathetic stri</del>kes of-organized labor that have been ordered, and in the extension of the railroad strike to other cities. There are indications that even in Onicago there will not be a general obedience to the strike that has been ordered by the labor unions and in other cities where the mad strike spirit has not extended, even railroad men, who are members of the Railway Union, are unwilling to jeopardize their situations for the sake of bolstering up what they see is a losing fight.

Many of the Lehigh Valley men, who lost their situations as a result of last winter's strike, have gone to Chicago to take the places of strikers on the Western roads. At the time of the Lehigh Valley strike agents of the company engaged many men in Western cities who had lost places as a result of strikes and who after months of idleness or effort at other occupations, gladly accepted a chance to again get a job at railroading. Western men broke the Lehigh strike and Lehigh men are helping break the Western strike. Thus it goes: they would go out if other unions Strikes in one section supply men to defeat strikes in another section and in the end the men are always losers.

The prompt indictment of Debs and his associates in the direction of the Railway Union strike was an inevitable sequence of Judge Grosscup's charge, who so interpreted the law as to make it plain that the strike leaders had violated the law. I had been generally assumed that so long as the leaders of strikes do not counsel or advise violence they are acting strictly within legal limits, but the United States statutes are broader in their scope and application than State laws, and there was no difficulty in finding sections under which Debs and his associates could be reached. In fact with the multitude of statutes, State and federal, that there are upon the books, a good lawyer has very little difficulty in finding a law that will make a crime of any act that is at all calculated to disturb the ordinary routine of business affairs.

The Proportional Representation Society has devised a scheme for Dayton tracks here. representation in the Senate and Assembly which was introduced in the Constitutional Convention, yesterday, by John Bigelow. It is proposed on time. A military escort accomto divide the State into five Senate panies every train. New men are districts, each of which shall elect seven Senators. Long Island and Staten Island are to be made the first district; New York city the second district; Orange, Rockland, Westchester, Putnam, Dutchess, Columbia, Sullivan, Uleter, Delaware, Greene and Otsego counties the third district, the northern part of the State the fourth and the western part of the State the fifth district. It is proposed to make twenty Assembly districts, each of which shall be entitled to seven Members of Assembly. The scheme proposes to make Orange county part of the twelfth district. grouping it with Sullivan, Ulster, Greene, Delaware and Otsego counties.

The one advantage of the plan of representation proposed is that it does away with the inequalities incident to apportionments made by par. tisan majorities for the purpose of securing the greatest possible partiean advantage. The disacvantages are the loss of community of interest | martial law. in the large districts proposed and the consequent loss of a sense of di- rounded the depot and trains are rect personal responsibility on the being made up. There has been no part of Senators and Assemblymen outbreak.

to their constituents. There is nothng new about the scheme. It is a return to the system of apportionment in force under the old con titutions of the State, which was abendoned half a century or so ago.

The Senate, yesterday, with only one dissenting vote, passed the bill admitting Utah as a State. The bill will have to be returned to the House for concurrence in a slight amendment made by the Senate.

Debs missed a great opportunity, vesterday. Instead of giving bail, he should have gone to jail. There he could have posed as a martyr, and responsibility for the failure of the strike, which seems inevitable. could have been shuffled off on the underlings who tried to manage while he was kept a prisoner through the arbitrary enforcement of " capitalistic laws."

Fellows' Installation-This Morning's Fire-Personal Notes,

From our regular correspondent. -About 11 o'clock, this morning, the fire companies were called out by an alarm of fire in Fullerton's barn on Montgomery street. Atter some this city, for the past week, returned delay, caused by the necessity of laying a great length of hose, they succeeded in getting water on the burning building,and quickly extinguishmaking preliminary arrangements ed the flames. The fire was confined for the Conductors' clam bake which to the basement of the building and will be held at Island Park, in that the horses were got out all right. The fire was caused by a boy throwing down alighted match as he was smoking. The loss, which is not heavy, is covered by insurance.

Sometimes one not only has to endure a trouble but sympathy besides. Sometimes we come in our journey through life to a bit of road that geems smooth enough. There is a rut or so now and then to be sure, but we have known much worse. If the sunshine is not so very bright, why then the shadows do not seem so black by contrast. Then we get to jogging along very comfortably, tolerably well satisfied with ourselves and our lot until some one takes to condoling with us about troubles we have grown used to bearing, and take rather as a matter of course, and then we begin to feel Ill-used and unhappy over our tribulations. Doubtless if poor Job had ashes with his boils and his potsherd, after a time he would have fate, but Bildad, the Shuhite, Eliphaz, the Temanite, and Zophar, the Nasmanhite, must needs sit down with him. It has always seemed to the writer that it was greatly to their credit that they preserved a liver and bowels, preventing fevers, discreet silence during seven days and nights, but perhaps they were spending the time in thinkig up what they would say when they once began. This may account for their Highest of all in Leavening Power.—Latest U.S. Gov't Report

The work of laying the brick on North street began at 1 o'clock, this afternoon, and the blocks were put in place with a rapidity that was surprising to those who have watched the progress of the asphalt paving.

A set of blocks moulded to fi against the rail of the electric road, and which require no cutting to fit, facilitates the work of laying the

blocks very much. The concrete has been laid on both sides of the track about two-thirds of the distance between Railroad avenue and Wickham avenue, and at the speed with which the laying of blocks was commenced it will be but a short time before the brick paving is com-

Look Toward the Light.

In a sickroom there was a little rosebush in a pot in the window. There was only one rose on the bush, and its face was turned full toward the light. This fact was noticed and spoken of, when one said that the rose would look no other way save toward the light. Experiments had been made with it; it had been turned away from the window, its face toward the gloom of the interior, but in a little time it would resume its old position. With wonderful persistence it refused to keep its face toward the darkness and insisted on ever looking toward the light. The rose has its

lesson for us. We should never allow ourselves to face toward life's gloom. We should never sit down in the shadows of any sorrow and let the night darken over us into the gloom of despair. We should turn our faces away toward the light and quicken every energy for braver duty and truer, hoher service. Grief should always make us better and give us new skill and power; it should make our hearts softer, our spirits kindlier, our touch more gentle; it should teach us its holy lessons, and we should learn them, and then go on with sorrow's sacred ordinatio vupon us to new love and better service.—Selected.

To Care For Plowers. To keep flowers looking well the water should be changed daily and old blossoms thrown away. Then the groups should be carefully adjusted with relation to each other so no two tall specimens should appear together. A little sunlight may do no harm, but cut flowers exposed to the full rays of a powerful sun wilt at once, and a pretty arrangement is soon spoiled. Early morning is the proper time to pick flowers. They should be immediately sprayed with a rubber sprinkler, which, by the way, is invaluable to one who is gathering fresh blossoms. We are apt to treat flowers carelessly-a handful of them picked in the heat of the day without a good sprinkling is soon in the same condition as a fish out of water.—New York Advertiser.

### AN ASP AND DEADLY.

AMERICA'S MOUT DITIDLY SNAKE IS THE PIGHU-DUATE.

It Is I ound In the Southwest | Lien Snake Charmers Are Afra'd ciff. A Tiny Thing, but It Kills Very Quickly - A Writer Fells of Dis First Meeting With One.

The southwest is more liberally supplied with venomous things than any other area in the Union. In the burning deserts, in the inhabited but arid expanses of New Mexico and Arizona. the rattlesnake abounds, and in several varieties, including the strange and deadly "sidewinder," Crotolus cerastes. The so called tarantula—really only a gigantic bush spider, but none the less dangerous because of the misnomer-is decidedly common. Scorpions are none too rare in the southern pertions of the territories, and in all parts centipeds of 7 to 8 inches long are frequent and neighborly. But the chief distinction of the region in this respect is the presence of the pichu-cuate, the deadliest snake in North America.

The pichu-cuate matches the worst serpent of India. Not only the most highly venomous, but the tiniest and most treacherous, he would be also the most dangerous—but, luckily, he is the rarest. He is the only true asp on this continent, and in the United States is never found outside of New Mexico and Arizona. That he was also known to the ancient Mexicans is apparent from his name-pichu-coatl, an Aztec word, which was brought up to our territory by the Spanish conquerors.

My first meeting with one was in Valencia county, N. M., in June, 1890, on the sandy flanks of the Cerro del Aire. I was out hunting jack rabbits, in company with some Indian friends, and had dismounted to stalk, leading my pet horse by the bridle. My eyes were on a small chapparo bush ahead, when suddenly Alazan snorted and reared backward so violently as almost to unhinge my arm. I looked about in surprise, for Alazau was too good a horse to mind trifles. As there was nothing to be seen, I started to pull him forward. Again he protested and with evident terror, and chancing to look at my very feet I understood his fear and felt very grateful that his senses were better than mine, for in another step I should have walked upon my death.

The only thing visible was a tiny object, not nearly so large as a good stag beetle-merely a head and perhaps an inch of neck. But it was the most frightful object in its kind that I had ever seen. The head, certainly neither so broad nor so long as my thumb nail, had a shape and an air of condensed malignity impossible to describe. It seemed the very essence of wickedness and hate, fairly bulging with deadly spite, and growing upon one until it looked several times its actual size. The ugly triangle (which is the distinguishing mark of all venomous snakes. being formed by the poison gland back of each eye) told me at once that Alazan was keeping up his reputationnever did he shy at a harmless snakeand the tiny horns, which added a peculiar and grotesque hideonsness, left no doubt that this was a pichu-cuate. He had buried himself most to the head in the gray sand, against which his upper skin was barely distinguishable, and thus in ambush was waiting for something to turn up.

Turning Alazan loose, I knelt at the safe distance of a yard to study the little creature, which fairly swelled with murderous rage. It not only struck madly at the chapparo switch I thrust to it, but at last, evidently discerning that the blame lay back of the switch, actually followed it up, and with such agility that I had to jump up and back without loss of time. The idea of retreat never seemed to enter that flat head. Sometimes he would lie and puff out with impotent rage, throwing his mouth so wide open that it seemed the venom must start, and sometimes he glided toward me, his head an inch above the ground, with an attitude which seemed to say, "Stand still there, and we'll see who laughs."

At last I killed him. He was neither larger round nor longer than an ordinary lead pencil; a cold, leaden gray on the back, but underneath rosy as the mouth of a conch shell. The fangs were tiny, not much more than an eighth of an inch long, and as delicate as the tiniest needle. A wondrous mechanism, this mouth, with its two automatic needles, so infinitesimal, yet so perfectly compotent. I opened the ugly little jaws wide, pressing upon the sides of the head, and when the recurving fangs had risen from their gronves in the roof of the month and stood tense a stream so inconcervably fine that the eye could barely note it spirited from each, and in the space of two or three mehes melted into invisible spray. Yet that jet, finer than a cobweb strand, was enough to give swift death to the largest and strongest animal that walks.

When the hunt was over, I told my Indian chums of the pichu-cuate and asked them many questions. They all knew of the snake, though several had never seen one, and all agreed that it is extremely rare. The crotalus ranks among the Pueblo divinities, and their charmers have no difficulty with that steady going and respectable reptile. But even among these people, with whom the cult of the rattlesnake has credualth shale in a sacred room, with special persis to attend him, the vil-Japonas lattle sand viper is accursed. "Show me an umbrella," says a manufacturer, "that has holes worn in the silk about the ring at the top, while the body of the material isstill intact throughout. and I will snow you the owner of an umbrella who doesn't deserve to own one, if it is a good one. And show me an umbrella that has holes in along the ribs before natural use of it should make them come there, and I will show you an owner who carries his umbrella more for the sake or appearance than for utility."

A wet umbrella placed handle down drips the moraure from it at the edges of the fame, and the material with which it is covered dries evenly and leaves no spot still soaked with water. If the handle is upward, the water runs down to one spot at the top, where the strong cloth lining about the ring holds a good deal of it and in a comparatively short time rots the material, and it breaks

The man who carries his umbrella swathed in its case when it is not called into use by rain will soon find it wearing out from top to bottom.

This is because of constant friction between the case and the silk, and no matter of how good quality it may be the holes will appear in it long before they should, and the provider of the umbrella will of course be blamed for selling inferior or damaged goods. There are many people so ignorant of the proper treatment of an unibrella that they will actually roll it up when wet and leave it to rot and mold until the next time they want it for use .- New York World,

For Kiderly People at the Seaside Who Have Time to Spare.

If you are an elderly lady and expect to pass the summer at a fashionable resort, you are naturally looking forward to a period of extreme boredom By a little care on your part this unpleasanthers may be casil; obviated.

It will only be necessary for you to move

among the young people and take part in their amusements. This may require a great deal of tact and some nerve on your part, and the young people may be inclined

to resent your presence among them, but the end will justify the means.

It is a good plan to become an courant of

all the flortations in the hotel in the early

This may be done by keeping a sharp eye to windward. Walking simlessly and noiselessly into dark corner of the piazza is usually an interesting occupation. Much valuable information may also be picked up by hiring a boatman to row you into all the seque-tered nooks on the lake. Of course you will always take the back seat on moonlight drives and keep your eyes and

ears open. In addition, it is well to learn by interrogating the bell boys which of the gentlemen patronize the bar to an undue extent, and by the same means you may easily ascertain the outcome of all the poker par-

The results of these observations of human nature cannot fail to afford agreeable topics of conversation to the little circle of ladies of your own age who will gather on the piazza in the mornings.

If the girls in the hotel are so irreproach-

able in conduct as to be absolutely uninteresting, much pleasure can sometimes be derived from looking up their antecedents. After you have found out where they come from you will usually be able to think of some friend who knows some one in their native city who will be only too glad to furnish you with a mass of statis tics in regard to the girls' ages, their previous engagements, their lack of social standing and their numerous flirtations.

This information, judiciously doled out, will serve to shorten many a long summer

Of course most of the married women will have husbands in the city. If you can learn, through your bureau of correspondents, of any one of these men taking ad. vantage of his wife's absence by drinking a schooner of beer, or inviting his typewriter to the roof garden, or by committing any other act of riotous dissipation, do not fail to inform his wife of it at once. Tell ber that you only mention it in confidence and then tell all the other ladies in the hotel directly afterward. The absent husband may also be made

the subject for investigation in regard to his business rating, the number of times he has failed, his disinclination to pay his debts and whether he has ever swindled anybody. Most men have something to conceal. Find it out! It is better for the

truth to be known.

And when the husband comes up to spend Sunday at the hotel, get him into a corner and give him a vivid description of his wife's occupations and the number of men she has smiled on during the week.

But these are only hints. I have no doubt you will be able to develop them into something really amusing and useful.-Brook-

Dbysical Developments of the Average Man" and "Average Woman"-Said to Relieve Mosquito Bites-The Dog Days-The Railroad and the Hacks

Two statues representing the "'average man" and the "average womau" have been modeled in Boston from 10.000 measurements of young men and 5,000 measurements of young women, taken by Dr. Sargent, physical instructor at Harvard. The statues show that while the average man makes a favorable showing in physical development matter. and comes only a little short of the accepted standards of manly perfection the average woman is far removed from the perfect type and lacks fifty per cent of being as beau-Mful as she ought to be.

A paragraph is going the rounds of the press that a menthol pencil, applied to a mosquito bite, will relieve the itching. The experiment can easily be tried and, if menthol possesses the power ascribed to it, a great deal of the discomfort incident to the summer season in mosquito infected localities will be done away

We have got rid of the old delusion that the rising of Sirius, the dog ar, at about the same time that the sun rises, has the effect of making the weather hot and sultry, but we EMH cling to a relic of the old superstition when we talk about dog days. The general belief is that the dog REVS begin about August 1st, and centinue through that month, but in reality July is the dog day month. and the dog day season, reckoned by the conjunction of the rising of Sirius with the rising of the sun. extends from July 2 to Aug. 11.

I asked a hackman, yesterday, what effect, if any, the electric railread had on his business. His answer was: "So far as I can see it has no effect at all. IN QUEST OF EVIDENCE.

Mr. Gedney Makes Complaint Against Two Alleged Fourth of July Celebrators-Witnesses to be Examined to See if There is Evidence to Justify the Issuing of Warrants.

The parties to whom Herbert Gedney, Esq. had sent communications notifying them to settle with him for the injuries custained by Mr. S. H. #### IT WAS A TRUE STORY.

A Middletown Fortune Teller and the Stolen Watch Recovered Through Her Agency.

The Port Jervis Union copies the Argus's story of the finding a stolen watch in that village through the aid of a Middletown fortune teller, and adds that the story is substantially correct except that the name of the woman who was robbed was Ranprogel instead of Lockwood.

The stolen watch was found in the shoe of Frank Krzyzanowski, who with a companion, was boarding the Well-Fargo Express, just as the Middletown seeress had predicted.

CETTING READY FOR CAMP.

Lots for Tents.

There was a large attendance at the drill of the 21th Separate Company at the armory, last evening. The drill was devoted to instruction in guard duty.

At the conclusion of the drill the men drew lots for the choice of tents, which they will occupy at State Camp next week.

It is thought the company will go into camp at least eighty strong. All the members are enthusiastic over

the prospect of the week's outing. SOUTH CENTREVILLE.

Report of Proceedings Ending July Just How the Accident to Richard Cochran Happened.

> EDITORS ARGUS. - I would like to correct a slight mistake in last evening's Argus, concerning the accident to Richard Cochran. Richard and all the rest, except two, had retired for the night. About 10:15, one of the boys came to the tent and asked Richard for his gun. Richard reached for the gun, which was not in the hands of a companion named Lee, but covered up with part of a blanket It is supposed that the hammer caught in a rent in the blanket and when released discharged the gun. He was not removed to his home after the amputation. This was a most distressing accident and we did all in our power to alleviate the young man's suffering.

Yet this misery is easily relieved: thousands of American women proclaim the fact.

The portrait presented here is that of Mrs. J. M. Bender, who lives on the old York Road at Nicetown, Pa. She has been for many years in very poor health. She had falling of the words and other forms of female weakness, with headache, severe backache, pains all over her body, and serious kidney trouble. Her blood was in such a bad state that

physicians said she had dropsy. Nearly discouraged she tried Lydio E. Pinkham's Vegetable Compound, and to her great surprise it made her a well woman. She now wishes to tell women all over the world to take the Vegetable Compound

and be well. Any druggist has it. Nothing in all the world has cured so many cases of female weaknesses as Lydia E. Pinkham's Vegetable Compound. Why don't you try it?

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria When she became Miss, she clung to Casteria. When she had Children, she gave them Castoria

ECZEMA ON LIMBS

How a Missionary Suffered. Death Only Relief Expected. Speedily

Cured by Cuticura. I have been troubled with chronic Eczema on

my limbs. The itching was very annoying and made me unit for work. I had tried many remedies and consulted a good physician, who pre-scribed for me mine months with no permanent relief. I gradually grew worse and worse. Death would have

worse. Death would have been a rehei, and it was the only rehei I expected. Just then my wife (I thank God for a good one) found the book you sent in some out of the way place and read it through. She discharged the attending physicam and said we would try the Cericura Remidle of last August, procuring a new supply when the first was exhausted. I am now well and attend to my missionary work. I am Secretary of the Sullivan County lable Society (portrait inclosed). Have been engaged in missionary work in the county for eighteen years. To recommend the Clift Cly Riym Dirs to sulfering humanity will be a part of my missionary work in the future.

#### **CUTICURA WORKS WONDERS**

The almost muraculous cures daily effected by the CULICULA REMIDIES prove them to be the greatest skin cures, blood purita is and humor remedies ever compounded. No statement is made regarding them not justified by the strongest evidence. People in every walk of life use them and recommend them. Their wonderful popularity and sale are due to the cures effected by them, and this is the most substantial evidence of their curative value. Sale greater than the combined sales of all other blood and skin remedies.
